1. The Appeal Brief filed on 2/22/2005 is defective for at least the following reasons:
 2. The brief does not contain a concise explanation of the invention defined in the claims involved in the appeal, which refers to the specification by page and line number, and to the drawing, if any, by reference characters as required by 37 CFR 1.192(c)(5).
 - a. The summary fails to refer to the specification refer to specific page and line numbers or drawings.
 - b. Section V of the brief contains only a general description of the invention, and is not directed to the claims involved in the appeal. Particularly, the summary states that data is transferred from an adapter directly into user target memory locations. The claims involved in the appeal state only that data is transferred directly into target memory locations, which has a significantly different scope.
3. The following defects are noted in section VIII. Argument of the brief.
 - c. Each issue should be treated under a separate heading. The brief currently addresses both the transfer of a message directly into target memory and transmission of an acknowledgement from the second system back to the first system in a single section.

d. In the arguments section, Applicant refers to claim "steps" 3 and 4 (Page 7, Lines 4-5 of brief), but fails to indicate which claim is being referred to. While the similarity of claims 1 and 3 is noted, steps 3 and 4 of each claim are different.
